

Liz Mayer

UX Content Strategist & Information Architect

Cambridge, MA 02141 | 508-237-0876 | lizmayer.contact@gmail.com

SUMMARY

High-agency content strategist with 10+ years of experience across almost every form that technical content takes—UX writing, documentation, IA, release notes, onboarding, training. Known for identifying what needs to happen, aligning quickly with leadership, and executing fast and completely with minimal oversight. Proven track record of building strong relationships with diverse teams across an organization. Exceptional project management instincts with a deep understanding of how content connects to business outcomes. An early adopter of AI in content workflows, with a focus on structured content and controlled natural language as the foundation for scalable, high-quality product experiences.

EXPERIENCE

Staff UX Content Strategist | Rapid7 | Dec 2024 - Present

- Defining information architecture and taxonomy for a unified platform experience as ~8 legacy products are consolidated; established next-generation navigation IA that reduced 100+ legacy pages to 15 primary navigation items, validated through customer research and usability testing.
- Leading migration of all help documentation from Markdown/Git to MadCap Flare, including platform strategy and content management design.
- Consolidating 5 misconfigured Pendo subscriptions into a single, correctly governed implementation, defining standards and strategy for organization-wide adoption and creating Rapid7's first Pendo COE of cross-functional administrators.
- Formalizing Rapid7's API documentation processes and standards alongside engineering leadership, using Swagger OpenAPI and MadCap Flare to create a modern, LLM-consumable suite of documentation.
- Developed Rapid7's first AI-powered writing technology using ChatGPT, and lead transition of the team's AI-assisted writing to Claude, including methodology, model training, and prompt standards for content production.
- Own the company style guide, terminology standards, and content taxonomy/glossary, and built standards for new in-product onboarding experiences and supporting help documentation.
- Spearheaded definition and execution of Rapid7's first product-led growth content strategy, leading a multi-organizational team to generate 250 product-qualified leads per month within 12 weeks, contributing to \$1.4M in ARR.
- Redefined Rapid7's release notes strategy, consolidating 14 disparate channels into a single company-level publication, improving customer satisfaction and retention while reducing inbound support volume.
- Building Rapid7's localization strategy for products and documentation.

Senior UX Content Designer, Operations and Strategy | Rapid7 | Dec 2022 - Dec 2024

- Led a cross-functional content project to produce quick-start documentation for a highly strategic product offering, coordinating 10+ stakeholders and consolidating 20+ internal documents.
- Established Rapid7's first formal content measurement program, operationalizing a content scorecard built on core usability heuristics.
- Built a Jira-based triage process for cross-functional content requests, used to identify and prioritize a backlog of 800+ historical tickets.
- Led research and adoption of writing best practices for LLM and AI-generated content, including long-form content and chatbots, based on rapidly evolving industry standards.
- Authored in-product UI text and user assistance content for highly technical cybersecurity software.
- Wrote online documentation and release notes using a Docs-as-Code approach.
- Provided mentorship and formal training to junior UX writers and interns.
- Partnered with Product Management, UX, Services, and Marketing to define roadmap-aligned content and track customer engagement.

Senior Technical Writer & Manager | TraceLink | Nov 2018 - Nov 2022

- Wrote help documentation and release notes for GxP pharmaceutical supply chain applications.
- Created end-to-end user assistance strategy for new, high-profile product offerings.
- Partnered with UX to write UI text and develop company-wide content styles and standards.
- Provided support and stabilization for the writing team during a period of rapid company growth.
- Led and mentored a team of three writers, providing structure and support to set them up for success.
- Delivered routine status updates and metrics reporting to upper management and conducted new-hire interviews and onboarding.

Technical Writer | Dimensional Insight | Jun 2017 - Nov 2018

- Authored documentation for new users of clinical data dashboards and collaborated with subject matter experts to identify customer information needs.
- Updated existing content to be task-based and accessible.

Intern, User Enablement | Oracle | May 2016 - May 2017

- Developed online help and video training content for clinical study software, using personas, workflows, and usability testing.
- Contributed to team style guidelines and best practices for training video content; wrote context-sensitive help and error messages.

CORE COMPETENCIES
